

Calling all recyclers!!

WPS wants to teach our students the importance of recycling and reducing the amount of trash we put into our landfills, and making our school more “Green”.

We are collecting all sorts of things and sending them to TerraCylce where they will be recycled and made into cool products! With each product we send in, Terracycle will donate money to our school to support our 21st century learners and help us get new technology.

Since we’ve started, we have saved over 12,300 juice pouches from going into landfills. We have also collected over 250 lunch kits. As we begin to recycle more in our school we wanted to start up some other collections!

We’re now collecting:

Please save any Elmer’s glue containers (sorry we can only take Elmer’s glue sticks or bottles) you use at school or at home. Just use all the glue. It’s that easy!

We are also collecting lunch kits (Lunchables and all other brands). Save the whole thing! The cardboard, the plastic container and the wrapper can all be recycled.

FritoLay has also partnered with Terracycle to help reduce waste. We will also be sending in chip bags. Doritos, Cheetos, Classic, Fritos (Any FritoLay brand).

Yup! Diaper packaging too! Any Huggies brand diaper wrapping can also be sent in and upcycled.

Scotch will also give money for every used scotch tape dispenser and/or plastic core to recycle them into new dispensers.

Nabisco and Keebler are also joining the cause to stop clogging landfills with their product waste. We are also looking for the packaging from any of their cookies.

Mars Candy Company will also donate money when we send in any of their candy wrappers!

And don't forget about our juice pouches! We save those too! Drink the juice and take out the straw (try to keep them flat).

The students will be recycling these products at lunch time and in their classrooms. We encourage parents to do the same at home and send them in.
